Objective

Motivated Computer Science student skilled in Python, full-stack development, and data integration. Seeking an entry-level software engineering role to build responsive, data-driven applications and contribute to dynamic technical environments.

Education

- 2023-2027 **B.Tech in Computer Science and Engineering**, Medicaps University, Indore
- 2023 **Class XII (Higher Secondary)**, Success Higher Secondary School, Shamgarh, 75%
- 2021 **Class X (Secondary)**, Higher Secondary School, Baghuniya, 94%

Technical Skills

- Languages Python, JavaScript
- Frameworks React.js, Node.js, Express.js
- Databases MySQL
- Developer Tools Git, GitHub, VS Code, LeetCode
- Libraries Pandas, Keras, TensorFlow, Matplotlib, BeautifulSoup, Selenium

Projects

- Jan 2026–Present **E-Commerce Price Comparator**, HTML/CSS, JS, Python, MySQL
 - [Work in Progress] Developing a web application to compare prices across e-commerce platforms like Amazon, Flipkart, and Myntra.
 - Provides a unified platform for users to efficiently compare product prices, features, and availability.
 - Designed and developed a responsive frontend (HTML/CSS/JS) and a robust backend (Python).
- Sep 2025–Nov 2025 **Product Data Aggregator**, Python, MySQL
 - Built a responsive frontend utilizing HTML, CSS, and JavaScript, powered by a Python backend.
 - Implemented MySQL database management to securely store structured product data and user credentials.
 - Engineered data fetching from multiple platforms, displaying results in a structured format to aid purchasing decisions.
- Jan 2024–Mar 2024 **Real-Time Price Tracker**, React, Node, MongoDB, Puppeteer
 - Developed a MERN stack web application for real-time product price comparison across e-commerce platforms.
 - Implemented web scraping (Puppeteer/Cheerio) to fetch live data and integrated RESTful APIs.
 - Designed an interactive frontend with React and Redux for efficient state management.
 - Optimized backend queries in MongoDB to handle high-frequency data updates.

Technical Competencies

Programming & Application Development

- Developed a MERN stack Price Comparison Application to aggregate real-time product data.
- Integrated Python web scraping (BeautifulSoup/Selenium) to fetch and compare live prices.
- Built a React frontend with search filters and a Node.js/MongoDB backend for efficient data management.

Data Extraction & Scraping

, Python, Flask, BeautifulSoup

- Built a scraping engine (BeautifulSoup/Selenium) to extract live pricing from Amazon and Flipkart.
- Designed a Bootstrap frontend allowing users to search products and view side-by-side comparisons.

Software Engineering

- Gaining practical knowledge of core software principles, including Agile methodologies and UML diagramming.

Interests

Web Scraping & Automation, API Integration, Real-time Data Processing, Full-stack Development
